

## Discussion Questions

1. What are some ways that floods significantly impact a community?
2. What are some protocols that should be followed in the immediate aftermath of a flood to minimize damage?
3. Do you feel that Ohio towns and cities are adequately prepared for a flood? Why or why not? If you believe they aren't, what are some ways they can become better prepared?
4. What are some other kinds of natural disasters other than flooding?
5. What are some recent natural disasters that occurred in the United States or around the World? What kind of natural disaster were they?
6. How does the damage from a flood compares to that of a hurricane?
